Air and sulfur hexafluoride gas, in vivo effects of, on rabbit corneal endothelium, 1028

Allografts, corneal, studies on the nature of the privilege enjoyed by, 137

thyroid, in anterior chamber of rabbit eye, primary rejection of, 675

Amines, adrenergic, which affect blood vessels of the anterior segment of the eye, local ganglion-like stimulating properties of some, 838

AMP-mediated, and other cyclic agents, on chloride transport of frog cornea, action of epinephrine and, 644

Announcements, 73, 126, 189, 260, 629, 714, 800, 871

Anoxia, hypothermia, influence of, electroretinogram of the living extracorporeal bovine eye, 691

Anterior chamber of rabbit eye, primary rejection of thyroid allografts in, 675

lens, cornea, aqueous humor of the open eye, in vivo measurements of oxygen tension in, 108

segment of the eye, local ganglion-like stimulating properties of some adrenergic amines which affect blood vessels of, 838

Antibodies, chlamydial, local and humoral, in trachoma patients of different age groups, 651

Aqueous humor, cornea, and anterior lens of the open eye, in vivo measurements of oxygen tension in, 108

dynamics, prostaglandin E_1 and, 1022

Autonomic dysfunction, optic atrophy, juvenile diabetes mellitus, diabetes insipidus, neurosensory hearing loss, and hyperalanineuria, retinal function in unique syndrome of, 617

B

Binocular interaction in the development of optokinetic reflexes in tadpoles of *Xenopus laevis*, 402

Blood-aqueous barrier, filtration of, 752

Book reviews, 74, 126, 190, 260, 711, 869, 1044

Bovine eye, extracorporeal, electroretinogram of the living, influence of anoxia and hypothermia, 691

lens alpha crystallins, calcium-induced aggregation of, 905

C

Calcium-induced aggregation of bovine lens alpha crystallins, 905

Capillaries in rat retina, quantitative ultrastructure, 916

retinal, dilatation and endothelial proliferation, in streptozotocin-diabetic rats, quantitative electron microscopy, 926

Capillary tubes and retinal arteries, laser Doppler measurements of blood flow in, 936

Carotid artery stenosis, quantitative evaluation of, 857

Cat, geniculocortical synapse in, morphology and physiology, question of parallel input to the striate cortex, 338

goldfish, and rhesus monkey, color-coded cells in, 411

*January, pp. 1-74; February, pp. 75-126; March, pp. 127-190; April, pp. 191-260; May, pp. 261-410; June, pp. 411-548; July, pp. 549-632; August, pp. 633-714; September, pp. 715-800; October, pp. 801-872; November, pp. 873-954; December, pp. 955-1058.

Cat—Cont'd
lateral geniculate neurons of, retinal inputs and physiology, 302
retinal ganglion cells, physiology of, 285
superior colliculus, effects of visual deprivation on, 460
visual cortex, development of synapses in, 377
development in, 394
pathways, some extrageniculate, 322
Cataracts induced in rats by N2-phenyl-B-hydrazinopropionitrile, studies on, 236
reversal of triparanol-induced, in the rat, exchange of 22 Na, 42 K, and 86 Rb in the cataractous and clearing lenses, 608
streptozotocin-produced, in rats, 56
Cell junctions at the outer synaptic layer of retina, 265
Cells, color-coded, in goldfish, cat, and rhesus monkey, 411
horizontal, in the retina of the turtle, responses of cones and, 275
Chicks, viral-induced ocular tumors in, 122
Chlamydial antibodies, local and humoral, in trachoma patients of different age groups, 651
Chloride transport of frog cornea, action of epinephrine and other cyclic AMP-mediated agents on, 644
Choriomeningitis, lymphocytic, virus-induced retinopathy in newborn rats, 850
Choroidal melanoma, dacron-graft, full-thickness eye wall resection, and experimental approach for treatment of, 115
Ciliary body, relationship between the blood flow velocity in, and the intraocular pressure of rabbit eyes, 945
Colliculus, superior, anatomic studies on, 434
and pretectum in visual behavior, 473
Colliculus—Cont'd
cat, effects of visual deprivation on, 460
retinal input to, 467
monkey, role of, in eye movement and vision, 451
primate, and shift of visual attention, 441
Color opponency from fovea to striate cortex, 427
Cone degeneration, progressive, acuity-luminance function in achromatopsia and in, factors related to individual differences in tolerance to bright light, 862
Cones and horizontal cells in the retina of the turtle, responses of, 275
Constancy, perceptual, illusion, perceptual, basis of, 525
Contact lenses, hydrophilic, permeability of, 58
Convergence, center of, of orientation and directional sensitivity, analysis of retinal receptor orientation, center of entrance pupil and, 1017
Cornea, aqueous humor, and anterior lens of the open eye, in vivo measurements of oxygen tension in, 108
electron microscopy in cases of marginal degeneration of the, 241
frog, action of epinephrine and other cyclic AMP-mediated agents on the chloride transport of, 644
Corneal amino acid supply and distribution, 723
collagenases, purification of, 728
endothelium and Descemet's membrane of the human eye, electron microscopy of fetal development of, 897
effect of lysosomes on, an in vivo study, 655
rabbit, in vivo effects of air and sulfur hexafluoride gas on, 1028
fine structure in experimental scorbutus, 633
graft rejection, scanning electron microscopy of, 1
Corneal—Cont'd
lesions in squirrel monkeys maintained on a low-chromium diet, 153
Cortex, striate, cat, hypercomplex cells in, 355
color opponency from fovea to, 427
of unanesthetized macaque monkey, spatial properties of neurons in, 368
question of parallel input to, morphology and physiology of geniculocortical synapse in cat, 338
visual, cat, development of synapses in, 377
Cortical response, human, variations in, to patterns and image quality, 789
Crystallins, alpha, calcium-induced aggregation of bovine lens, 905
Cyclopean perception and neurophysiology, 540
Cytologic studies, subretinal fluid, and isoenzymes and, 1037

D

Dark adaptation, vector voltmeter as tool to measure electroretinogram spectral sensitivity and, 783
Diabetes insipidus, optic atrophy, juvenile diabetes mellitus, neurosensory hearing loss, autonomic dysfunction, and hyperalanineuria, retinal function in unique syndrome of, 617
mellitus, juvenile, optic atrophy, diabetes insipidus, neurosensory hearing loss, autonomic dysfunction, and hyperalanineuria, retinal function in a unique syndrome of, 617
Descemet's membrane of the human eye, electron microscopy of the fetal development of corneal endothelium and, 897
Doppler, laser, measurements of blood flow in capillary tubes and retinal arteries, 936

Dynamics, aqueous humor, prostaglandin E_1 and, 1022

E

Elastic fiber in human sclera, electron microscopic studies of, 816
Electron microscope, critical point drying of soft biological material for the scanning, 127
microscopic studies of the elastic fiber in human sclera, 816
microscopy in cases of marginal degeneration of the cornea, 241
tissue preparation, scanning, 133
Electroretinogram, of the living extracorporeal bovine eye, influence of anoxia and hypothermia, 691
oscillatory potential of human, evoked by monochromatic light, 683
spectral sensitivity and dark adaptation, vector voltmeter as tool to measure, 783
Endothelial cells, corneal, rabbit, cultured, effect of lysosomes on, 662
proliferation of retinal capillaries in streptozotocin-diabetic rats, quantitative electron microscopy, dilatation and, 926
Endothelium, corneal, and Descemet's membrane of the human eye, electron microscopy of fetal development of, 897
effect of lysosomes on, an in vivo study, 655
rabbit, in vivo effects of air and sulfur hexafluoride gas on, 1028
Entrance pupil, center of, and center of convergence of orientation and directional sensitivity, analysis of retinal receptor orientation, 1017
Epinephrine and other cyclic AMP-mediated agents on chloride transport of frog cornea, action of, 644
Extraocular muscle dystrophy, phase-electron microscopic study of, in mouse, 715
extrafusal muscle fibers, structure and innervation of sheep superior rectus and levator palpebrae, 956
levator palpebrae, muscle spindles, structure and innervation of sheep superior rectus and, 970
Eye, anterior segment of, local ganglion-like stimulating properties of some adrenergic amines which affect blood vessels of, 838
human, enucleated trabeculotomy and sinusotomy in, 21
enucleated, viscoelectric response in, 593
movement and vision, role of the monkey superior colliculus in, 451
wall resection, full-thickness, and experimental approach for treatment of choroidal melanoma, dacron-graft, 115
experimental approach for treatment of choroidal melanoma, homo- and heterograft, 668

F

Fiber, elastic, in human sclera, electron microscopic studies in the, 816
Fovea, striate cortex, color opponency from, 427
Friedenwald Award, 550
Friedenwald Award, acceptance, 553
Frog cornea, action of epinephrine and other cyclic AMP-mediated agents on chloride transport of, 644

G

Ganglion cells, physiology of cat retinal, 285
Geniculate body, lateral, aspects of synaptic and laminar organization of the mammalian, 291
Geniculate—Cont'd
nucleus, lateral, nonretinal influences on, 311
Geniculocortical synapse in cat, morphology and physiology of the, question of parallel input to the striate cortex, 338
Geniculostriate system, importance of early visual experience for neurons of the developing, 386
Glaucoma, gonioscopy in, interpretive, 97
patient, functional status of the, 102
primary open-angle, increased cellular sensitivity to glucocorticoids in, 832
Glucocorticoids, increased cellular sensitivity to, in primary open-angle glaucoma, 832
Glycine in rabbit retina, uptake of the putative neurotransmitter, 191
Goldfish, cat, and rhesus monkey, color-coded cells in, 411
Gonioscopy in glaucoma, interpretive, 97
Graft rejection, corneal, scanning electron microscopy of, 1

H

Hearing loss, neurosensory, optic atrophy, juvenile diabetes mellitus, diabetes insipidus, autonomic dysfunction, and hyperalanineuria, retinal function in unique syndrome of, 617
Hemodynamics, ocular, effect of sympathetic stimulation on, 211
Hyaluronate and protein, vitreous structure, distribution of, 159
role of, vitreous structure, 164
Hydrophilic contact lenses, permeability of, 58
Hyperalanineuria, optic atrophy, juvenile diabetes mellitus, diabetes insipidus, neurosensory hearing loss, and autonomic dysfunction, retinal function in unique syndrome of, 617

Hypertension, ocular, induced by scleral suction cup, 29
Hypothermia, anoxia, influence of, electroretinogram of the living extracorporeal bovine eye, 691

I

Illusion, perceptual, constancy, perceptual, basis of, 525
Innervation and structure of sheep superior rectus and levator palpebrae extraocular muscles, extrafusal muscle fibers, 956
of sheep superior rectus and levator palpebrae extraocular muscles, muscle spindles, structure and, 970
Intraocular dynamics of lactic acid in the rabbit, 600
pressure of rabbit eyes, relationship between blood flow velocity in ciliary body and, 945
INVESTIGATIVE OPHTHALMOLOGY, new editor of, 955 (Editorial)
Iris, pigmented and nonpigmented, cocaine-binding by, and its relevance to mydriatic effect, 739
Isoenzymes and cytologic studies, subretinal fluid, 1037
Isoproterenol-induced suppression of cell division in rat lens epithelium, possible cyclic adenosine monophosphate mediation in, 231

L

Lactic acid, intraocular dynamics of, in the rabbit, 600
Laser-coagulated and normal primate retina, peroxidase diffusion in, 35
Doppler measurements of blood flow in capillary tubes and retinal arteries, 936
Laties, Alan M., publications of, 553
Lens fibers, primate, interlocking patterns on, 809
macaque, absorption in vivo, 177
Lenses, cataractous and clearing, reversal of triparanol-induced cataracts in rat, exchange of 22 Na, 42 K, and 86 Rb in, 608
contact, hydrophilic, permeability of, 58
Levator palpebrae extraocular muscles, extrafusal muscle fibers, structure and innervation of sheep superior rectus and, 956
muscle spindles, structure and innervation of sheep superior rectus and, 970
Light, monochromatic, oscillatory potential of human electroretinogram evoked by, 683
Lymphotcyte-retrobulbar fibroblast interaction: stimulating mechanisms and inhibition thereof, 15
Lysosomes, effect of, on corneal endothelium, and in vivo study, 655
cultured rabbit corneal endothelial cells, 662

M

Macaque lens absorption in vivo, 177
Mammalian, retinas, observations of mode of action of ouabain upon the electrical activity of, 706
quantitative analysis of some effects of ouabain upon the electrical activity of, 699
Melanoma, choroidal, dacron-graft, full-thickness eye wall resection, an experimental approach for treatment of, 115
treatment of, full-thickness eye wall resection, experimental approach, homo- and heterograft, 668
malignant, uveal, ultrastructural comparison of spindle A, spindle B, and epithelioid-type cells in, 873
Membrane, retrocorneal fibrous, 822
Monkey, macaque, spatial properties of neurons in striate cortex of unanesthetized, 368
rhesus, cat, and goldfish, color-coded cells in, 411
superior colliculus, role of in eye movement and vision, 451
Monochromatic light, oscillatory potential of human electroretinogram evoked by, 683
Mouse, phase-electron microscopic study of extraocular muscle dystrophy in, 715
Muscles, levator palpebrae extraocular, extrafusal muscle fibers, structure and innervation of sheep superior rectus and, 956
Mydriatic effect, cocaine-binding by pigmented and nonpigmented iris and its relevance to, 739

N

N2-phenyl-B-hydrazinopropionitrile, studies on cataracts induced in rats by, 236
Nerve, optic, primate, fiber characteristics of the foveal outflow, morphology of, 1004
Nerve, optic, primate, method and total fiber count, morphology of, 980
primate, optic, total fiber size distribution and fiber density distribution, morphology of, 989
Neurohistology, specific, comes of age, a look back and a look forward, 555
Neurons, lateral geniculate, of cat, retinal inputs and physiology, 302
spatial properties of, in striate cortex of unanesthetized macaque monkey, 368
striate, receptive field concepts, 346
organization, 357
Neurophysiology, cyclopean perception and, 540

Neurotransmitter, putative, uptake of, glycine into rabbit retina, 191

O

Ocular hypertension induced by scleral suction cup, 29
hypertensive response to prostaglandin E_2, consensual, 845
tumors in chicks, viral-induced, 122
Ophthalmoscopy, tonometry, interpretation of, 75
Optic atrophy, juvenile diabetes mellitus, diabetes insipidus, neurosensory hearing loss, autonomic dysfunction, and hyperalanineuria, retinal function in unique syndrome of, 617
Optic nerve, primate, fiber characteristics, of the foveal outflow, morphology of, 1004
method and total fiber count, morphology of, 980
total fiber size distribution and fiber density distribution, morphology of, 989
Optokinetic reflexes in tadpoles of *Xenopus laevis*, binocular interaction in the development of, 402
Ouabain, observations of the mode of action upon electrical activity of mammalian retinas, 706
quantitative analysis of some effects of upon the electrical activity of mammalian retinas, 699
Oxygen tension in the cornea, aqueous humor, and anterior lens of the open eye, in vivo measurements of, 108

P

Permeability of hydrophilic contact lenses, 58
Peroxidase diffusion in normal and laser-coagulated primate retina, 35
Phase-electron microscopic study of extraocular muscle dystrophy in mouse, 715
Pilocarpine, enzymatic hydrolysis of, 747
Polyinosinic-polycytidylic acid complex influence of on experimental acute toxoplasmic retinochoroiditis in rabbits, 182
Pressure measurement, which tonometer, 80
Primate lens fibers, interlocking patterns on, 809
optic nerve, method and total fiber count, morphology of, 980
fiber characteristics of the foveal outflow, morphology of, 1004
total fiber size distribution and fiber density distribution, morphology of, 989
Prostaglandin, consensual ocular hypertensive response to, 169
E_1 and aqueous humor dynamics, 1022
E_2, consensual ocular hypertensive response to, 845
Protein, hyaluronate, vitreous structure, distribution of, 159
Proteoglycanases, lysosomal, presence, significance, and inhibition of, 149

R

Rabbit corneal endothelial cells, cultured, effect of lysosomes on, 662
endothelium, in vivo effects of air and sulfur hexafluoride gas on, 1028
eye, primary rejection of thyroid allografts in anterior chamber of, 675
relationship between the blood flow velocity in ciliary body and the intraocular pressure of, 945
influence of polyinosinic-polycytidylic acid complex on experimental acute toxoplasmic retinochoroiditis in, 182
intraocular dynamics of lactic acid in, 600
retina, uptake of the putative neurotransmitter, glycine into, 191
Rabbit—Cont'd
tetrahydrotriamcinolone and triamcinolone, effect on xenograft reaction in, 894
Rats, age-related changes in retinal capillaries and fatty acid composition of retinal tissue of normal and essential fatty-acid-deficient, 760
lens epithelium, possible cyclic adenosine monophosphate mediation in isoproterenol-induced suppression of cell division in, 231
lymphocytic choriomeningitis virus-induced retinopathy in newborn, 850
retina, quantitative ultrastructure of capillaries in, 916
reversal of triparanol-induced cataracts in, exchange of 22 Na, 42 K, and 86 Rb in the cataractous and clearing lenses, 608
studies of cataracts induced in, by N2-phenyl-B-hydrazinopropionitrile, 236
Retina, outer synaptic layer, cell junctions at the, 265
primate, normal and laser-coagulated, peroxidase diffusion in, 35
rabbit, uptake of the putative neurotransmitter, glycine into, 191
rat, quantitative ultrastructure of capillaries in, 916
turtle, responses of cones and horizontal cells in, 275
Retinal arteries, and capillary tubes, laser Doppler measurements of blood flow in, 936
function in a unique syndrome of optic atrophy, juvenile diabetes mellitus, diabetes insipidus, neurosensory hearing loss, autonomic dysfunction, and hyperalanineuria, 617
receptor orientation, analysis of, results of initial psychophysical tests, 765
center of the entrance pupil and the center of convergence of orientation and directional sensitivity, analysis of, 1017

Retinal—Cont'd
tissue of normal and essential fatty acid-deficient rats, age-related changes in retinal capillaries and the fatty acid composition of, 760
traction in vitro, 46
Retinas, mammalian, observations of the mode of action of ouabain upon the electrical activity of, 706
quantitative analysis of some effects of ouabain upon the electrical activity of, 699
Retinochoroiditis, toxoplasmic, in rabbits, the influence of polyinosinic-polycytidylic acid complex on experimental acute, 182
Retinopathy, virus-induced, in newborn rats, lymphocytic choriomeningitis, 850
Retrobulbar fibroblast-lymphocyte interaction: stimulating mechanisms and inhibition thereof, 15
Retrocorneal fibrous membrane, 822

S

Scanning electron microscopy of corneal graft rejection: epithelial and endothelial rejection and posterior graft membrane formation, 1
Schiøtz tonometer, electric, constant-pressure tonography based on, 585
Sclera, human, electron microscopic studies of the elastic fiber in, 816
Scleral suction cup, ocular hypertension induced by, 29
Scorbutus, corneal fine structured in experimental, 633
Sheep superior rectus and levator palpebrae extraocular muscles, extrafusal muscle fibers, structure and innervation of, 956
levator palpebrae extraocular muscles, muscle spindles, structure and innervation of, 970
Sinusotomy and trabeculotomy in enucleated human eyes, 21
Spatial after effects, 533
Spindle A, spindle B, and epithelioid-type cells in uveal malignant melanoma, ultrastructural comparison of, 873
B, spindle A, end epithelioid-type cells in uveal malignant melanoma, ultrastructural comparison of, 873
Squirrel monkeys, corneal lesions in, maintained on a low-chromium diet, 153
Stability, visual, 518
Stenosis, carotid artery, quantitative evaluation of, 857
Stereoscopic vision, interaction of color and luminance in, 482
Streptozotocin-diabetic rats, dilatation and endothelial proliferation of retinal capillaries in, quantitative electron microscopy, 926
produced cataracts in rats, 56
Structure and innervation of sheep superior rectus and levator palpebrae extraocular muscles, extrafusal muscle fibers, 956
sheep superior rectus and levator palpebrae extraocular muscles, muscle spindles, 970
Subretinal fluid, isoenzymes and cytologic studies, 1037
Suction cup, scleral, ocular hypertension induced by, 29
Sulfur hexafluoride gas and air, in vivo effects of, on rabbit corneal endothelium, 1028
Superior rectus and levator palpebrae extraocular muscles, extrafusal muscle fibers, structure and innervation of sheep, 956
extraocular muscles, muscle spindles, structure and innervation of sheep, 970
Synaptic layer, outer, retina, cell junctions at the, 265

T

Tadpoles, *Xenopus laevis*, binocular interaction in development of optokinetic reflexes in, 402
Tear calcium levels, measurement of, 258
Tetrahydrotriamcinolone and triamcinolone, effect on xenograft reaction in rabbits, 894
ocular penetration, 890
Tonography, constant-pressure, based on the electric Schiøtz tonometer, 585
Tonometer, Schiøtz, electric, constant-pressure tonography based on, 585
which, pressure measurement, 80
Tonometry, ophthalmoscopy, interpretation of, 75
Trabeculotomy and sinusotomy in enucleated human eyes, 21
Trachoma patients, local and humoral chlamydial antibodies in different age groups, 651
Traction, retinal, in vitro, 46
Triamcinolone and tetrahydrotriamcinolone, effect on xenograft reaction in rabbits, 894
ocular penetration, 890
Tumors, ocular, in chicks, viral-induced, 122
Turtle, retina, responses of cones and horizontal cells in, 275

V

Vector voltmeter as a tool to measure electroretinogram spectral sensitivity and dark adaptation, 783
Viscoelasticity under non-steady-state conditions, pseudofacility effect of, 221
Viscoelectric response in the enucleated human eye, 593
Vision, stereoscopic, interaction of color and luminance in, 482
Visual attention, primate superior colliculus and shift of, 441
behavior, superior colliculus and pretectum in, 473
cortex, structure and connections, 333
field, glaucomatous, 85
motor system, mapping the visual sensory onto, 490
oculomotor connections, nature of, 497

Visual—Cont'd
pathways in cat, some extrageniculate, 322
system, processing of intensity and wavelength information by, 417
Vitreoretinal juncture, topographical variations, 801
Vitreous collagen, composition of bovine vitreous structure, 735
structure, composition of bovine vitreous collagen, 735
distribution of hyaluronate and protein, 159
role of hyaluronate, 164

X

Xenograft reaction in rabbits, tetrahydrotriamcinolone and triamcinolone, effect on, 894
Xenopus laevis, tadpoles, binocular interaction in development of optokinetic reflexes in, 402
